The Demerit of having a technique that’s passed down from generations

is having a user’s manuel

The demerit is that information about the technique is easily leaked

You were a member of the Tabby clan, weren’t you?

That’s why you know so much about the Meowless technique

However, even in the Kitty clan only a scant few know about this

Take the litter and the catnip, then smash those two different expressions of kitty and push out imaginary meow

I wanted to take down the pinnacle of feline world.
